Research and Data Analysis | Bangladesh

Project Title	Research and Data Analysis Bangladesh
Project Summary	Use your analytical, research, and writing skills to create a weekly news roundup, a monthly trade data report, and a quarterly case study highlight in which you will interview and write on preselected U.S. food and beverage companies active in the Bangladesh market.
Country	United States

Project Description

Bangladesh is a rapidly growing market for U.S. food and agricultural exporters. Annual U.S. agricultural exports to Bangladesh have grown from \$494 million in CY2015 to \$956 million in CY2019, a 93 percent increase over five years (approximately 18 percent compounded annual growth). As such, the U.S. agricultural community is looking for timely reporting of data trends, in-country news, and case studies that showcase the opportunities and challenges of the market. As a VSFS intern for the U.S. Department of Agriculture (USDA) Foreign Agricultural Service (FAS) in Dhaka, Bangladesh, you would be responsible for providing this important information. Use your analytical, research, and writing skills to create a weekly news roundup, a monthly trade data report, and a quarterly case study highlight in which you will interview and write on preselected U.S. food and beverage companies active in the Bangladesh market. The three initiatives (i.e., roundup, report, and highlight) are equally important and will require the VSFS intern to be detail oriented, a skilled writer, and have a desire to analyze data trends.

Required Skills or Interests

Skill(s)
Data analysis
Editing and proofreading
Research
Writing
